

FEATURES

- Yucca Schidigera Extract
- Bio-available Trace Minerals
- Yea Sacc®1026

"IT MAKES A WORLD OF DIFFERENCE"

VITAMINS AND MINERALS FOR LIVESTOCK

YUCCA 5-WAY PAC

TRACE MINERAL SUPPLEMENT

For use in diets of mature horses where additional supplementation of these nutrients may be beneficial.

*For Animal Treatment Only.
This product does not contain restricted animal material.*

YUCCA 5-WAY PAC

A TRACE MINERAL SUPPLEMENT FOR MATURE HORSES

SPECIAL INGREDIENTS

DAC® YUCCA 5-WAY PAC provides a trace mineral profile suitable for all classes of mature horses. Minerals play a critical role in numerous metabolic functions including: reproduction, bone development, nerve function, immune function, hoof, skin and coat quality as well as energy balance.

Yucca Schidigera Extract – Active components of yucca include steroidal saponins and polyphenolics such as resveratrol and yuccaols. Yucca phenolics also are antioxidants and free-radical scavengers, which may aid in suppressing reactive oxygen species that stimulate inflammatory responses. Antioxidants are believed to reduce inflammation and pain by scavenging free radicals, which are thought to trigger tissue inflammation at the cellular level via oxidative reactions. Yucca has also been known for its ability to reduce ammonia (NH₃) from animal waste. The **Yucca Schidigera Extract** used in **DAC® YUCCA 5-WAY PAC** is a high quality source provided by Alltech® branded De-Odorase®.

Yea Sacc®1026 - is a live yeast culture derived from the specific yeast strain *Saccharomyces cerevisiae* 1026. **Yea Sacc®1026** increases fiber, phosphorus and calcium digestibility in mares, and increases gross energy, total lipids and amino acid absorption. **Yea Sacc®1026** improves milk availability to foals if administered for 3-4 weeks before and throughout the lactation period.

Bio-available Trace Minerals – or chelated minerals are those that have been bonded to two or more amino acids. A mineral in this chelated state allows easy passage through the intestinal wall into the blood resulting in increased metabolism of that mineral. **DAC® YUCCA 5-WAY PAC** utilizes organic minerals to increase availability and enhance absorption rates.

Bio-available Copper – is essential in the synthesis and maintenance of connective tissue.

Bio-available Zinc – is a micro mineral found throughout the body including in bone and muscle.

Bio-available Manganese – is essential for the synthesis of chondroitin sulfate necessary in cartilage formation. Deficiency results in abnormal cartilage and bone development.

FEEDING DIRECTIONS

DAC® YUCCA 5-WAY PAC can be fed with either fortified or unfortified grains. Fortified grains contain added vitamins and minerals and require a lower feeding rate of **DAC® YUCCA 5-WAY PAC**. Feed **DAC® YUCCA 5-WAY PAC** at the following rates:

Mature Horse	1 scoop (1 ounce) per horse per day if fed with unfortified grains
---------------------	--

Consult an equine nutritionist or **DAC®** if feeding with fortified grain.

Feeding rate based on 1000 lb. horse.

GUARANTEED ANALYSIS

(Per Scoop – 1 ounce)

Crude Protein (min)	12% (3,400 mg)
Crude Fat (min)	5% (1,400 mg)
Crude Fiber (max)	6% (1,700 mg)
Copper (min)	2,000 ppm (56 mg)
Zinc (min)	6,200 ppm (176 mg)
Manganese (min)	3,200 ppm (90 mg)
Cobalt (min)	200 ppm (5.6 mg)
Yucca Schidigera Extract	234 mg

INGREDIENTS

Distillers dried grains with solubles, yucca schidigera extract, zinc proteinate, copper proteinate, manganese proteinate, cobalt proteinate, yeast culture, corn oil, sodium bentonite and natural and artificial flavor.
